DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The amendment mailed on September 18, 2002 has been entered.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 124-136, drawn to a medical polymer prosthesis, classified in class 623, subclass 23.58.
 - II. Claims 137-149, drawn to method of treating polyethylene, classified in class 264, subclass 494.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product made (UHMWPE) may be made by another process such as simple radiation, without the use of supplemental heat, partial melting, or cooling.

Upon the election of Group II. there is a further restriction:

- i. Claims 137-138 and 144.
- ii. Claims 139-141 and 147-149.
- iii. Claims 142-143.
- iv. Claims 145-146.

Art Unit: 3738

3. Inventions i., ii., iii., and iv. are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions obtain different effects. Group i. produces multiple melting peaks, Group ii. produces partial melting, Group iii. produces absence of free radicals, Group iv. produces wear reduction.
4. Because these inventions are distinct for the reasons given above and the search required for Group II. is not required for Group I., restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
